Project Deliverables (Final Version)

Workpackage 1

Task 1.1 - State-of-the-art in Context Aware Technologies (Appendix B)

Task 1.2 - Choice of the Context-Aware Technology (Appendix C)

Task 1.3 - Intelligence-Oriented Tools for Networking (Appendix D)

Workpackage 2

Task 2.1 - Identification and Comparison of Appropriate Virtualization Solutions (Appendix A)

Task 2.2 - Definition of Virtual Interfaces (Appendix E)

Task 2.3 - Identified Virtualization Solution Modification/Adoption (Appendix F)

Workpackage 3

Task 3.1 - [Service and Resource Overlay Algorithms] ([Europe-version]) (Appendix G)

Task 3.2 - [Piloting system] ([Europe-version]) (Appendix H)

Task 3.3 - [Situated View] (Appendix I)

Workpackage 4

Task 4.1 - [Internet Service Requirement Analysis and Case Study] (Appendix J)

Task 4.2 - [Overall System Architecture Design] (Appendix K)

Task 4.3 - [Implementation of a demonstrator] (Appendix L)

Technical Reports Development

The technical reports of the project are controlled through subversion (SVN). The repository address is: [https://svn.gta.ufrj.br/reports] (restricted access)
