WNetVirt 2013
Second Workshop on Network Virtualization and Intelligence for the Future Internet

October 25-27 2013 - Angra dos Reis, Rio de Janeiro, Brazil.

CALL FOR PAPERS

WNetVirt brings together researchers working on Future Internet technologies. This workshop will provide an international forum for experts to exchange ideas and present results of ongoing research in the Future Internet, Post-IP, Network Virtualization, Intelligence, and New Architectures. We solicit original papers on a wide range of Future Internet topics. We particularly encourage the submission of position papers that describe novel research directions and work that is in its formative stages, and papers about practical experiences and lessons learned from production systems.

Topics of interest include but are not limited to the following:

- Technologies for Future Internet
- Network protocols and architectures
- Autonomous and self-organized networks
- Self-Management Frameworks
- Quality of services and traffic engineering
- The Internet of Things
- Content distribution networks
- Cloud computing and network virtualization
- Software-defined networking
- Algorithms for Future Internet
- Security, trust and privacy challenges

- Mobile Internet applications
- Information-centric networking
- Social networks
- Crowdsourcing and cloud services
- E-services and smart cities
- Green computing
- Big data
- Wireless and mobile networks
- Mesh, ad hoc and sensor networks
- Vehicular ad hoc networks
- Programmable networking

IMPORTANT DATES:

Paper submission: September 29, 2013

Acceptance Notification: October 10, 2013

Camera Ready Due: October 17, 2013

ORGANIZING COMMITTEE:

General Chairs: Guy Pujolle (UPMC, France)

Igor Moraes (UFF, Brazil)

TCP Chairs: Heiko Niedermayer (TUM, Germany)

Pedro Velloso (UFF, Brazil)
